Recruitment Team

United Nations Population Fund (UNFPA)

Subject: Application for UNFPA Consultant Roster

Dear Hiring Team,

I am excited to apply for the UNFPA Consultant Roster, as my expertise in data analytics, information management, monitoring & evaluation (M&E), and geospatial analysis strongly aligns with UNFPA's mandate. With over nine years of experience in humanitarian and development sectors, I have leveraged data-driven insights to enhance evidence-based decision-making, program effectiveness, and strategic planning.

As a Senior Information Management Officer at iMMAP Nigeria (deployed to UNFPA's GBV Area of Responsibility – GBV AoR), I have played a pivotal role in humanitarian data coordination and program monitoring. My key contributions include:

- Humanitarian Response Plan (HRP) Monitoring & PiN Calculation – Designed and implemented interactive Power BI dashboards for tracking HRP progress, ensuring real-time visibility on achievements, gaps, and funding progress. Led the People in Need (PiN) calculation process using geospatial severity ranking and statistical modeling, ensuring accurate population targeting for GBV response efforts.
- Humanitarian Program Cycle (HPC) Model Review – Conducted technical reviews of GBV projects, ensuring alignment with UNFPA's strategic priorities. Provided guidance on target setting, resource allocation, and impact measurement.
- Geospatial & Predictive Analytics – Developed risk analysis maps using ArcGIS and GeoPandas, identifying high-risk zones to guide targeted humanitarian interventions.
- Referral Pathway Optimization – Designed a Referral Pathways Mapping Dashboard, enhancing cross-sector coordination between GBV, WASH, Nutrition, Health, and Education sectors, thereby improving service accessibility for survivors.

- Capacity Building & Stakeholder Engagement – Provided training and technical support to humanitarian partners on data systems (KoboToolbox, ODK, Power BI, Tableau), strengthening data literacy and reporting accuracy.

Beyond technical expertise, I exemplify UNFPA's values of integrity, commitment to diversity, and results-driven collaboration. Having worked extensively with UN agencies, government entities, and non-profits, I thrive in multi-disciplinary environments, fostering evidence-based programming and data-driven policy formulation.

I am eager to contribute my expertise to UNFPA's global initiatives and support humanitarian response, gender equality, and reproductive health programs. I welcome the opportunity to discuss how my skills and strategic approach can add value to UNFPA's mission.

Thank you for your time and consideration. I look forward to the possibility of working with your esteemed organization.

Sincerely,
Tersoo Yaji
